

k-mers in DBG backend

cDBG node structures

phmap: k-mer hash \Rightarrow pointer

Decision Node

- k-mer hash
- node ID
- sequence

Decision Node

- k-mer hash
- node ID
- sequence

phmap: end k-mer hashes \Rightarrow pointer

Unitig Node

- left end hash
- right end hash
- node ID
- sequence
- type meta

Unitig Node

- left end hash
- right end hash
- node ID
- sequence
- type meta
